## ROMANOFF ADJUSTABLE THERMOSTATS

DIAL SHAFT "B"

### CHECKING CALIBRATION

EACH THERMOSTAT IS ADJUSTED AT THE FACTORY AND CALIBRATED ON PRECISION INSTRUMENTS TO CONTROL TEMPERATURES ACCURATELY. ADJUSTMENT OR RECALIBRATION IS NOT NEEDED UNLESS THE THERMOSTAT HAS BEEN MISHANDLED IN TRANSIT, OR CHANGED OR ABUSED WHILE IN SERVICE.

### TO CHECK CALIBRATION

USE AN ACCURATE THERMOMETER TO CHECK TEMPERATURE.

### TO CALIBRATE

1. REMOVE KNOB FROM DIAL SHAFT "B" BY PULLING STRAIGHT OUT.

2. WITH SCREWDRIVER, TURN SCREW "A" CLOCKWISE TO DECREASE AND COUNTERCLOCKWISE TO INCREASE TEMPERATURE. DO NOT ALLOW DIAL SHAFT "B" TO TURN DURING THIS OPERATION.
3. TURNING SCREW "A" 1/4 TURN IS A CHANGE OF APPROXIMATELY 35° F.
4. REPLACE KNOB OR CONTROL DIAL. AFTER A CALIBRATION IS MADE LET THE UNIT OPERATE UNTIL THE TEMPERATURE HAS STABILIZED, THEN RECHECK TO DETERMINE WHETHER OR NOT THE CALIBRATION HAS BEEN CORRECTED.
