# 7. Handling and storage

## 7.1. Precautions for safe handling

None of the additives are listed in the Code of Federal Regulations (CFR) Title 291910.1000 paragraph subpart Z - Toxic and Hazardous Substances. This material is an inert, nonhazardous solid, however it is recommended that gloves be used during prolonged handling.

This product can generate formaldehyde at approximately 150 degrees C and above in the presence of air. Formaldehyde is a skin and respiratory sensitizer, eye and throat irritant, acute toxicant and potential cancer hazard. Use adequate ventilation and/or wear protective equipment when this product is heated at approximately 150 degrees C and above. This material has no known hazardous properties. ACGIH and OSHA exposure limits are no longer relevant to compounding ingredients after incorporation into rubber. However since this material contains more than 1% ingredients listed as hazardous in OSHA 1910.1200, it is recommended that the protected measures described below should be followed.

See section 2 for further details. - [Prevention]:

## 7.2. Conditions for safe storage, including any incompatibilities

**Skin** Wear overalls to keep skin contact to a minimum. Gloves recommended

**Engineering Controls** Provide adequate ventilation. Where reasonably practicable this should be achieved by the use of local exhaust ventilation and good general extraction. If these are not sufficient to maintain concentrations of particulates and any vapor below occupational exposure limits suitable respiratory protection must be worn.

**Other Work Practices** Use good personal hygiene practices. Wash hands before eating, drinking, smoking or using toilet. Promptly remove soiled clothing and wash thoroughly before reuse.

See section 2 for further details. - [Prevention]:
