# Romanoff Vari-Temp Heating Tool Instructions

*74-004 (110V) / 74-004A (220V) & 74-004-WHI (110V) / 74-004A-WHI (220V)*

---

*This complete unit includes a control box, deluxe handpiece, cord and plug, also 3 different heating tips.*

1) Plug control box into appropriate electric outlet (220V models require an electrical plug to be attached to the end of the electrical cord since most foreign countries use different electrical plugs.

2) Push the electric plug of the handpiece cord into the electric female socket which is on the front of the control box.

**IMPORTANT: BE SURE TO TURN THIS PLUG TO THE RIGHT AS FAR AS IT WILL GO. THIS WILL PREVENT THE PLUG FROM COMING OUT DURING USE.**

3) Push the red button to the "ON" position. It should light up.

4) Turn the powerstat up the desired heat for the tip and use your vari-temp.
