Indutherm

# MTC 100 V

Platinum Casting  
Machine

NEW

NEW

NEW

- Excellent form filling thanks to novel high speed pressure and tilting system
- Up to 600g Platinum
- Also for casting ingots
- Automatic tilting with adjustable speed and adjustable pressure increase

## Vacuum Overpressure Platinum Casting Machine MTC 100 V

Easy to use,  
compact design,  
with support  
for large  
flasks

Also available  
as a standalone  
tabletop unit!

MTC 100 V's Innovative high speed pressure and tilting system result in excellent form filling!

### Maximize your casting quality

- perfect form filling
- reduced porosity
- finest surface quality
- Up to 600g Pt, for flasks up to Ø 100\*150mm
- Can also cast gold and silver alloys
- Cast ingots
- High quality multi-wavelength infrared pyrometer (optional)
- 8 kW induction power, up to 2100° C
- Automatic tilting with adjustable speed
- Adjustable pressure build-up
