## Tiger3D Resins

Name	Features	Weight
 Burgundy	Easily Castable, Wax-Like Properties	500g
 Orange	Metal & Dental Applications, Castable	250g
 Blue	Prototyping, Strongest Material	500g
 Clear	Prototyping, See-Thru Properties	500g

### RESOLUTION

The unique Protective Layering System reduces the stress from layered printing, providing extremely smooth surfaces that are desired when casting jewelry.

### PRODUCTIVITY

Tiger 3D Printers are capable of being your production center, with desktop models capable of printing up to 80 wedding rings at once, or 4K models up to 300 wedding rings in one build plate.

### CASTABILITY

We have a selection of castable resins, allowing your parts to be directly casted and formed into metal. Our world famous Burgundy resin is used by jewelers and casters all over the world.

## Why Choose Us

-  Great after-sales support to ensure you are running your Tiger at maximum efficiency and productivity.
-  15+ years experience in the 3D Printing industry, as well as 70 years experience in manufacturing equipment sales.
-  With over 1200+ 3D printers installed, we have the knowledge and experience to share with you.
-  Full print builds in hours, not days. Print your models in the morning and cast them in the afternoon.

**Smoother Surfaces**

### Protective Layering System

All Tiger3D Printers utilize a unique Protective Layering System which works by minimizing the moving parts within the printer to provide smoother surfaces, more precise printing, and allows for faster build times.

**Precise and Accurate**

### High Resolution Printing

Take advantage of high resolution and accurate printing without sacrificing productivity or quality.

**International Customers**

### Worldwide Support

Tiger3D Printers are available to be shipped worldwide, with technical support via Video-Call.
